

❖ IMAGE**❖ OVERVIEW**

- ESAC is a product of DTDAuto Technology Team – Institute of Physics, Hanoi, Vietnam.
- ESAC is designed to use in vocational schools where trainees are taught principles of construction & operation of Electronic Air Suspension System in modern vehicles.
- ESAC is modern training-equipment providing all basic elements in technique training such as: Listening, Watching, Acting; simulates online with specialized computer-software.
- The system is built visually based on Electronic Air Suspension System of Toyota vehicles; connects online to a computer to control, simulate & display and graph the operation.
- ESAC is designed, made in Vietnam with the German standard of training-equipment.
- Help trainees to understand or get:
 - + The basic system construction
 - + Good-points as well as weak-points compared

❖ TECHNICAL FEATURES**1. Computer software**

- E-textbooks include static-images, animation, illustration video..., which simulate online the construction and the operation of ESAC system.
- Work well on projectors and in Multimedia classes.
- Connected to a computer by COM or USB port to control ESAC model.
- Graph the operation and compare normal air suspension with ESAC Electronic air suspension
- Lookup circuit diagrams, lookup & read fault codes automatically and give repair suggestions.

2. Board component system

- The system includes:
 - + 04 Air suspensions (*equivalent replacement*)
 - + 01 Valve to divide compressed air)
 - + 01 Motor (*to create force*)
 - + 04 Height sensors
 - + 01 Steering angle sensor
 - + 01 Throttle position sensor
 - + 01 Brake pressure sensor
 - + 01 Speed sensor
 - + 01 Adjuster (*to change cart load*)
 - + 04 bumped wheels
 - + 01 Parameter display panel
 - + 01 Control panel
 - + 01 Electronic control unit
 - + 01 Air compressor
 - + 01 vibrator with 4 direction eccentric Camshaft

<p>with normal suspension</p> <ul style="list-style-type: none">+ Operation principles of Electronic Air Suspension System.+ Circuit diagrams, real positions of parts in a Toyota vehicle+ Fault diagnosis and basic repairing methods <p>❖ COMPONENTS</p> <ul style="list-style-type: none">- 01 Model (<i>simulating ESAC system</i>)- 01 CDROM of training-software of ESAC system- 01 desktop computer, 01 printer and 01 table (<i>extra optional</i>)- Reference documents, textbooks- 01 12V/50A battery, 01 charge unit and other accessories, cables	<ul style="list-style-type: none">+ Contacts, fuses, warning lights, circuit diagrams, air tubes...+ 01 electrostatic-panted steel frame with mobile-wheels- Directly manipulate with real parts on the model- Make characteristic study of the operation with a computer <p>❖ OTHER SPECIFICATIONS</p> <ul style="list-style-type: none">- Voltage: 220VAC/50Hz and 12VDC/50A- Total weight: about 120 kg- Using area: 1900 X 700 X 1600 mm- This kind of product is indoor equipment
